

Mergers & Acquisitions

We advise public and private companies in planning, structuring, negotiating and financing M&A transactions, including asset sales, stock sales, mergers, liquidations, and other types. Besides companies, we also represent lenders, private equity firms, shareholders, key employees, and other parties involved in M&A transactions.

We strive to ensure that each aspect of the transaction receives careful attention and consideration. Our ability to maintain focus on the goals and objectives of our clients has allowed us to resolve even the most challenging obstacles in order to close deals under favorable circumstances.
