

Adoption

Adoption can be one of the most joyous events imaginable. Adoption-related family law is about family planning. Adoption can include extending parental legal rights to include a stepchild, expanding a family by adopting a new baby, providing care for a child without a home, or addressing an unplanned pregnancy.

No matter what the circumstance, Best & Flanagan lawyers provide both thorough and considerate counsel throughout the adoption process in order to ensure that our client's hopes become a reality. Adoption can be rewarding for both the parents and the child, so seeking the counsel of an experienced attorney can make a significant impact on the outcome.

Our lawyers fully understand the adoption process from all angles. We maintain literally decades of combined expertise in adoption law, and we are involved in both open and closed private adoptions, a sampling of which includes:

- › Step-parent child adoption
- › Child adoption by relatives
- › Adult adoption

Our clients include opposite-sex couples, LGBT couples and single individuals interested in adoption. Whether or not our client is married or is cohabitating, we have proven successful in achieving their adoption-related objectives. We have a passion for helping clients who seek to adopt, and our zeal is demonstrated in everything we do.
